

UT ONE HEALTH INITIATIVE

# Lunch & Learn Seminar Series

This series brings together speakers from across UT, the nation, and world to discuss their work and how they tackle current global challenges.

From decreased biodiversity to increased anti-microbial resistance, the health of all living organisms is affected by the health of others.

This series will explore how solutions can be achieved by viewing these problems through a One Health lens.

**Wednesday, October 6, 2021 | 12 - 1pm EST**

**Dr. Michelle Dennis**

**Associate Professor  
Biomedical and  
Diagnostic Sciences  
UT College of  
Veterinary Medicine**

## **Disease in a Hard-Shell: A Tough Case to Crack**

*Challenges to Investigating  
Mussel Mortality and Declines*
