

Science of Team Science Workshop

October 28, 2021 | 12:00 - 1:00pm

Liberating Structures for Consilience and APT Methodologies

Dr. Elizabeth Strand
University of Tennessee

This session will provide important definitions and tools for facilitating consilience within transdisciplinary teams. It will also introduce Liberating Structures as an open access tool for attaining consilient solutions as well as an overview of Adaptive, Participatory, and Transdisciplinary (APT) research methodology. Participants will leave the session having curated a collaborative list of university resources and friends who support excellence in consilient research, education, and service.
