Even though there may be the best of intentions and solid funding, sometimes interdisciplinary teams fail to attain all they can because of these differing viewpoints and approaches.

Tune in on March 10 to learn how to increase your awareness and skills as both an interdisciplinary team member and leader!

### Polyvagal Theory & the Science of Team Science:
A Virtual Dialogue & Liberating Structures Experience

**When:** Thursday, March 10 | 10am - 3pm
**Where:** Online via Zoom and GatherTown
**Cost:** $60 early bird registration; $75 after February 15
$40 student registration
*(UT transfer voucher accepted; ask your Dean or Department Head for funding info)*

---

**Dr. Stephen Porges**
is the originator of Polyvagal Theory, Distinguished University Scientist at the Kinsey Institute at Indiana University, and Professor of Psychiatry at the University of North Carolina. He is a recipient of a National Institute of Mental Health Research Scientist Development Award and is the creator of the Safe and Sound Protocol™, a non-invasive application of Polyvagal Theory designed to reduce stress and auditory sensitivity while enhancing social engagement and resilience.

**Dr. Stephen Fiore**
is a Professor at the University of Central Florida and Director of the university’s Cognitive Sciences Laboratory. His primary area of research is the interdisciplinary study of complex, collaborative cognition and the understanding of how humans interact socially and with technology. Dr. Fiore is a founding conference committee member for the Science of Team Science annual conference and a founding board member and past-president of the Interdisciplinary Network for Group Research.
